

provide a substantially watertight enclosure 13 once flap 15 is folded up causing the engagement of strips 18 and 34. Also, attaching all three components of the pocket 10, the enclosure 13, the flap 15, and the ~~Velcro®~~ strips 18 directly to the garment 12 in spaced relation, as opposed to each other, significantly reduces the profile of the pocket 10 to produce a more streamlined, integrated look.

IN THE DRAWINGS

The drawings have been amended to delete the text portion. No new matter has been added.

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (currently amended) An accessory pocket for attachment to a garment comprising:

a first component forming an inner enclosure having a border portion directly attached to said garment and a translucent interior portion;

a second component forming a first ~~attachment means~~ closure means attached to said garment in spaced relation to the border portion, said first closure means including four separate strips adjacent three sides of said inner enclosure; and,

a third component forming a flap attached to said garment in spaced relation to said inner enclosure and said first ~~attachment~~ closure means, said flap having a ~~attachment~~ second closure means adapted for releasable engagement with said first ~~attachment~~ closure means, said flap sized to completely cover said translucent interior portion of said inner enclosure.

2.(currently amended) The accessory pocket of claim 1 wherein said first ~~and second~~ attachment means and allow for ~~substantially watertight~~ water resistant engagement of said flap to said first attachment means.

3. The accessory pocket of claim 1 wherein said enclosure includes an opening defined by a top edge, and wherein sealing means is provided for sealingly engaging said top edge to said garment.

4. The accessory pocket of claim 1 wherein said flap includes a bottom edge, said bottom edge attached to said garment in spaced relation from a corresponding lower edge of said enclosure.
5. The attachment of claim 1 wherein said enclosure has side edges, said enclosure attached to said garment along said side edges and said lower edge.
6. (New) The attachment of claim 1 wherein said first, second, and third components are position in co-planar relation on said garment.
7. (New) amended)An accessory pocket for attachment to a garment comprising:
 - an inner enclosure having a border portion directly attached to said garment and a translucent interior portion;
 - a first closure means directly attached to said garment in spaced relation to said border portion, said first closure means including four separate strips adjacent three sides of said inner enclosure; and,
 - a flap attached directly to said garment in spaced relation to said inner enclosure and said first closure means, said flap having a second closure means adapted for releasable engagement with said first closure means, said flap sized to completely cover said translucent interior portion of said inner enclosure.
